

**We install Fire Alarm systems for  
your business.**

**Ademco  
Firelite.**

Fires are dangerous. Even controlled fires can turn unmanageable: A lit cigarette or candle left unsupervised, a can of gasoline or paint, could accidentally cause a fire in the home and in the workplace. Therefore, you need to put a fire system in place to protect yourself, your family, employees and property. Call us to discuss a full range of fire equipment to provide fire protection and help contain and extinguish fires. Choose from a large range of fire equipment including fire alarms, detectors, evacuation and exit signs, fire alarm control panels, horns, strobes and sirens, keypads and voice evacuation panels for home, business and industrial fire protection.
